CORPS MONITORING

INTRODUCING CORPS PROTECT
OUR ENHANCED PEOPLE PROTECTION SERVICE

As a security business that heavily relies on its colleagues, we understand better than anyone the daily risks your employees face and the repercussions these risks can have on your business. That's why, with both you and your employees in mind, we created Corps Protect—an enhanced service by Corps Monitoring that places the safety of lone workers at its heart.

Protecting Lone Workers: A Legal and Moral Imperative
Every day, 150 lone workers face physical or verbal attacks, according to the British Crime Survey. This represents 20% of the total workforce. Incidents are widespread across industries, with 68% of companies reporting lone worker incidents in the past three years.

Current HSE legislation, including the Health and Safety at Work Act 1974 and the Management of Health and Safety at Work Regulations 1999, mandates employers' responsibilities with sector-specific laws. However, with at least 8 million lone workers in the UK, ensuring their safety is more than just a legal obligation—it's a moral one. Protecting your people is far less costly than the potential risks, including legal consequences and damage to your reputation.

Corps Protect: Tailored Lone Worker Protection
Monitoring lone workers and ensuring effective communication is crucial. For social workers or delivery drivers, a discreet, easy-to-activate device is essential, while those in remote areas need robust protection that works even with limited mobile coverage.

With a fully scalable service based on a personalised risks assessment, Corps Protect has been designed to meet the lone working needs based on the degree of risk or hazard inherent to each job role and the specific conditions of each working environment. Developed by our **NSI Gold, BS5979 accredited Alarm Receiving Centre (ARC)**, Corps Protect operates under the latest version of the British Standard Provision of Lone Worker Services Code of Practice BS8484. The key benefit of this accredited solution is that serious incidents can be fast-tracked to the police to generate the highest priority Level 1 response when necessary.

HOW OUR PEOPLE PROTECT SERVICE WORKS

RED ALERT (SOS BUTTON)
When a lone worker needs immediate help, the Red Alert feature connects them directly to our Alarm Receiving Centre (ARC):

1. **SOS Button Activation**: The lone worker presses the SOS button on their device to raise a Red Alert.

2. **Alert Activation**: The Red Alert is instantly triggered in our BS5979 NSI Gold Alarm Receiving Centre (ARC).

3. **Operator Response**: Highly trained ARC Operators listen in and assess the situation. If safe, they will communicate with the lone worker directly.

4. **GPS Tracking**: The worker's location is automatically obtained, and the Amber alert message is updated.

5. **Custom Escalation**: ARC operators follow your customised escalation process.

6. **Emergency Assistance**: Depending on the situation, the ARC operator will escalate the issue to emergency services or the client's pre-defined contacts.

PROTECT

AMBER ALERT (PRE-RECORDED SAFETY MESSAGES)

The Amber Alert feature allows lone workers to record key information in case of an emergency:

1. **Risk Identification:** Upon arrival at a location with potential risks, the lone worker activates the Amber Alert.
2. **Information Recording:** The worker records a short message on their device, noting their exact location and relevant details.
3. **Set Duration:** The worker inputs the expected duration of their visit into the device.
4. **Automatic Response:** If a Red Alert is triggered or the Amber timer expires, ARC operators listen to the recorded message and take appropriate action.

## PERSONALISED PROTECTION FOR EVERY LONE WORKER

At Corps we know that every workplace is different, and so are the risks. That's why we offer a variety of options to fit your needs, including mobile apps, dedicated devices, and wearable technology. You can choose what works best for you and your team.

CORPS PROTECT FOB

Our smallest and most discreet product, the SOS Alarm offers powerful protection with GPS, Amber Alert, and man-down detection. Weighing just 35 grams, it's easily worn on a lanyard, strap, or key fob, providing one-click safety without disrupting daily routines.

CORPS PROTECT ID BADGE

A discreet personal alarm device designed as an identity card holder, offering full lone worker protection. Equipped with comprehensive safety features, it integrates effortlessly into the worker's day-to-day activities, providing vital security.

CORPS PROTECT MOBILE APP

Part of the Corps Protect line, Corps Protect is a revolutionary app that transforms any smartphone (iOS and Android) into a powerful personal security device, eliminating the need for extra equipment. Users can activate alarms, gather evidence, and access 24/7 GPS monitoring, protecting against dangers like violence, falls, and car accidents.

CORPS PROTECT WATCH

The Corps Protect Watch is a cutting-edge Android smartwatch designed for lone worker safety. It tracks movements, logs locations and events, and offers real-time monitoring with rapid location tracking. Delivering immediate support in emergencies, it provides a new level of protection for field workers.

CORPS PROTECT BODY WORN VIDEO

The Corps Protect Body Worn Video provides robust protection for lone workers. This body-worn camera serves as a powerful visual deterrent, helping to reduce verbal and physical assaults, especially in high-risk areas. It boosts worker confidence by offering real-time video evidence and reliable support in challenging situations.

Every lone worker deserves the same level of protection and peace of mind as everyone else.

At Corps, we're committed to making that a reality. Corps Protect helps employers like you make this possible, providing the safety and support your people need in the most critical circumstances.

WHY CHOOSE CORPS PROTECT

Customisable and Flexible:

We tailor Corps Protect to fit your specific lone worker needs and environments.

24/7 Industry-Leading Response:

Our UK-based 24/7 ARC operates under BS 8484, BS5979, and NSI Gold standards, ensuring top-level protection. In the event of an incident, Corps Protect provides rapid, industry-leading response with immediate action and support.

Bespoke Training:

We provide personalised training to ensure your team feels confident using the service.

Comprehensive Reporting:

Access scheduled, event-triggered, or on-demand reports in multiple formats—accurate and timely.

Dedicated Technical Support:

Our Customer Service and Technical Support teams are always available to provide immediate, ongoing assistance.
